

People's expectation toward individual mobility requires more than just a convenient means of transportation. The old understanding of cars has become outdated. A car represents individuals' lifestyles, and it became an integral part of their lives. At the same time, the automobile industry has experienced seismic change. Hyundai Motor Company has grown rapidly to become one of the largest automakers, backed by world class production capability and superior quality. We have now reached a point where we need a qualitative approach to bring bigger ideas and relevant solutions to our customers. This is an opportunity to move forward and we have developed a new brand slogan that encapsulates our willingness to take a big leap. Led by our new slogan and the new thinking underlying it, we will become a company that keeps challenging itself to unlock new possibilities for people and the planet.

NEW THINKING.
HYUNDAI NEW POSSIBILITIES. H350 H350

HYUNDAI H350 A NEW CONTENDER FOR LIGHT COMMERCIAL VEHICLE MARKET

H350 brings a fresh wind to the Light Commercial Vehicle market. Its state of the art ultra rigid chassis gives it the versatility to carry Van, Chassis Cab or Bus bodywork. Hyundai quality and ability have given it staying power and class defining comfort. Millions of kilometers of physically punishing testing have ensured it can handle the worst possible climate conditions.

Its elegant, functional design gives it street presence and credibility.

Whatever the challenges, it has the power and quality to meet them. That is great news for your business.

OUTSTANDING, DISTINGUISHED MODERN DESIGN WITH HYUNDAI'S LATEST FAMILY AESTHETIC

Hyundai's modern family aesthetic has been applied to the exterior design of H350 to ensure it is consistent with the sophisticated styling of Hyundai.

H350 has a hexagonal grille while stylish headlamps wrap around the front of the new vehicle and are available with optional projector lighting and LED Daytime Running Lights. Mirrors with integrated LED side repeaters improve visibility to other road users, and side mouldings protect the vehicle's flanks. Exterior and interior LED-lights further contribute to the stylish appearance and overall energy efficiency of the vehicle.

A GREAT PLACE TO WORK ERGONOMICS THAT BUILD EFFICIENCY

H350 is also car–like in terms of its space and visibility. The cabin is designed to accommodate the tallest occupants and delivers best–in–class head room and leg room.

Precise dashboard ergonomics ensure ease-of-use and safe operation. Convenience and safety meet right in front of the driver. A multi-function steering wheel means audio and multi driving information display are literally fingertip controlled.

H350 has switches that feel good, operate easily
and simply carry on working.

Keyless entry and remote locking
The highly secure remote locking of H350.
Remote key locks and unlocks the doors and deactivates the vehicle alarm horn.

REFINED LEVELS OF DRIVER AND PASSENGER COMFORT

Clever interior layout and packaging creates a 'Mobile office', designed to ease the driver's daily task. For maximum practicality, there are up to 25 storage compartments around the cab and three power outlets as standard, comfortably exceeding the class norm.

With a generous 1582 mm cab width, H350 can be specified with two or three cab seats. When fitted, the center seatback folds flat to form a work surface, featuring twin cup holders.

Optimized drivers seat

The driver's seat has been totally optimized for driver's seating preferences and working

Center seatback console

COMFORTABLE RIDE, STABLE YET DYNAMIC HANDLING

H350 has been engineered to deliver a comfortable ride, accurate handling and responsive driving dynamics. The horizontal leaf spring and its spring rate have been optimized for improved side loading thus reducing lean-in during cornering and improving overall handling. The rear leaf springs support the widest span of any vehicle in its class. This ensures that the cargo deck remains low to the grounds for ease of loading, yet the vehicle is still able to accommodate heavy loads without significantly affecting its ride height.

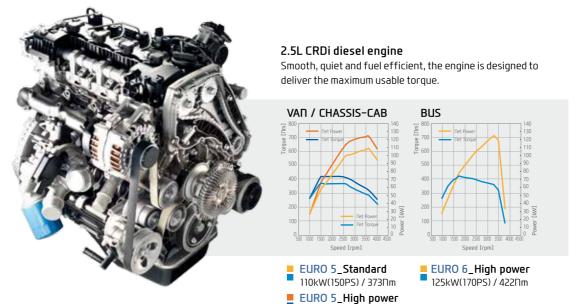

CLASS-LEADING PERFORMANCE AND OPTIMIZED FUEL EFFICIENCY

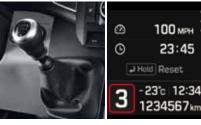

H350 is powered by Hyundai 2.5L CRDi diesel engine, longitudinally mounted at the front and driving the rear wheels via a six–speed manual transmission.

H350 CRDi engine is offered with a choice of standard power (110 kw / 150 ps) and high power (125 kw / 170 ps), delivering 373 Nm and 422 Nm of torque respectively. Both versions generate maximum torque in the most-used rev-band, between 1500 / 2500 rpm.

The powertrain has been carefully engineered and tuned to maximize drivability when fully laden across a broad range of driving conditions. The smooth-shifting six-speed manual transmission is fitted with a spread of gear ratios designed to fully exploit the available engine torque and ensure a smooth ride for occupants.

125kW(170PS) / 422Nm

6–speed transmission and Gear Shift Indicator (GSI)

GSI suggests optimal gear shift timing for better fuel efficiency

Idle Stop and Go (ISG)

Fuel-stretching system automatically switches the engine off and then restarts it within a split-second during a congested driving

Advanced Battery Management System (ABMS)

The ABMS regenerates breaking energy.

Maximizing the input to ensure that the battery is
always at peak efficiency while saving energy.

SOPHISTICATED SAFETY FEATURES AND A HIGH-STRENGTH BODYSHELL

Drivers and passengers will benefit from a range of advanced active and passive safety technologies available with H350.

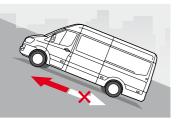

The Vehicle Dynamic Control system combines high-tech, automatic 'active safety' driving aids. Roll Over Mitigation to minimize the chance of over-turning, Engine Drag Control to prevent rear axle locking during engine braking, Hydraulic Brake Assist to quickly activate the brakes and Emergency Stop Signal system to alert following drivers. In addition, Lane Departure Warning System and Hill-Start Assist Control, which prevents 'roll back' are also available.

Front airbags for driver and passenger

Roll Over Mitigation (ROM)

Emergency Stop Signal (ESS)

Hill Start Assist (HSA)

High strength frame

For optimum crew and cargo protection, 75 % of the chassis of H350 is made from high tensile steel. Anti-corrosion alloy steel has been applied to 98% of the bodyshell and the entire body structure is then electro-plated before painting to ensure it resists rust and perforation.

Vehicle Dynamic Control System (VDC)

By combining all of the electronic driving assists, the VDC keeps the vehicle firmly on course by independently activating the relevant brakes.

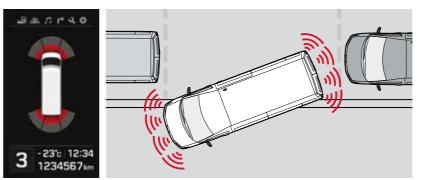

Front and rear Park Assist System (PAS)

SMART TECHNOLOGIES ARE OPTIMIZED FOR COMFORT, CONNECTIVITY AND EFFICIENCY

With more and more of our time being spent in our vehicles due to road congestions, everyone can appreciate the value of smart technologies that can make every day driving easier. That's why H350 is equipped with smart technologies that assist the driver in bad weather, on the highway, in city streets, or when parking in confined spaces.

Smart technologies include user-friendly cruise control with a high-visibility display in the instrument cluster showing the vehicle's current speed, rear safety camera, Park Assist System and rain-sensor that triggers the windscreen wipers.

Convenient and safer parking

Front and rear Park Assist System (PAS)

Park Assist System ensures convenient and safer parking with high sensitivity digital sensors, cluster display and alert alarm.

Electronic Chromic Mirror (ECM) with Rear Camera Display (RCD)

The inside rear-view mirror of the wagon is an electronic chromatic type that automatically dips when dazzled by a following vehicle's headlamp main beams.

Auto-cruise control

Easy to set, sophisticated in operation, the cruise control cuts driver effort and protects against speeding tickets.

Hands free Bluetooth system

Enjoy wireless connectivity and between your Bluetooth–enabled mobile phone and H350's multimedia sound system. Includes a built–in microphone for hands–free dialing.

Rain sen:

Located at the top center of the windscreen, this sensor can detect the very first droplets of rain and then automatically activates the windshield wipers.

WHATEVER YOUR BUSINESS NEEDS, H350 HAS THE CAPACITY TO DELIVER

Whatever you need to move, wherever you need to take it, H350 delivers.

Check out the ample dimensions of H350's load space and you'll understand just why H350 stands apart from the rest of the competition.

With 14 load lashing points for maximum cargo stability, a 12-volt power outlet at the back and rear and side door lamps it maximizes convenience.

12.9 m³ of clear, uncluttered load space, ready for freight, but also ready to be converted for any usage you need. Whatever your needs, H350 fits perfectly.

SPACIOUS CARGO SPACE AND VERSATILITY

All body types of H350 features an efficient ratio of exterior-to-interior dimensions and cargo space that betters the competition. The long-wheelbase model accommodates five Euro pallets in its 3665 mm long room length, which boast a best-in-class 12.9 m³ cargo space. The short-wheelbase model can carry four Euro pallets and has a capacity of 10.5 m³.

Whether loading or unloading H350, It's easy work thanks to the short distance from the ground to the cargo deck. Load space between the rear wheel arches has not compromised thus maximizing cargo hauling capacity and convenience.

CHASSIS-CAB PROVIDES SOLID FOUNDATION FOR CUSTOMIZATION

Rigid toughness makes the chassis the perfect business basis. H350 provides the basis for a wide variety of successful applications.

The chassis frame structure is engineered for strength and durability and provides a solid foundation for customized bodywork and special-purpose vehicle manufacturing.

WHATEVER YOU WANT EQUIPPED WITH WHATEVER YOU NEED

H350 is ready to go anywhere, no matter how hard the conditions. Choose short or long chassis, with 3435 mm and 3670 mm wheelbase for any number of applications. In addition, the long stay mirror is already available to make the fullest use of the generous width.

When secondary machinery must be powered, the optional Power Take Off makes it a simple matter of plugging in and turning on.

Towing CapacityA class-leading 3 ton towing capacity bring the total vehicle load capability up to 4.5 ton, meaning few loads are impossible.

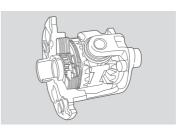

Long stay mirror

The wide bodies feature mirrors with extra-long arms for excellent rearward

Rear suspension The rear leaf springs have been optimised for heavy conditions and special bodywork demands.

Locking differential (LD) The locking differential ensures that you get maximum traction when suddenly lose traction and control of the vehicle.

THE BEST WAY TO MOVE PEOPLE

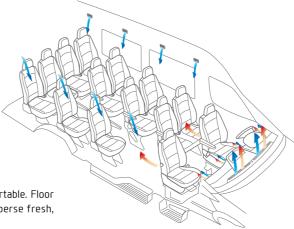

The passengers in H350 will experience an unaccustomed sense of space. In addition the overhead storage, personal reading lights and airflow ventilation mean every journey is made much more comfortable. Impressive safety that surrounds and protects the passengers, H350 brings impressive freshness and quality to wherever it is needed.

BUSINESS CLASS COMFORT ON THE ROAD

The refined interior design reflects the latest design trends achieving elegant and classy interior space for passengers.

LED overhead lighting is precise without being harsh, a sliding door or the front passenger door with inbuilt step makes entry easy and the hand rails are in the right place. There is even a sophisticated 8 speaker sound system that brings clear sound to every seat. Flush fitted side windows and specially developed air conditioning help ensure the perfect interior climate.

Air conditioning system

State of the art air management keeps everyone in H350 comfortable. Floor mounted heating ducts control warmth. Overhead nozzles disperse fresh,
