

NEW THINKING. NEW POSSIBILITIES.

outdated. A car represents individuals' lifestyles, and it became an integral part of their lives. At the same time, the automobile industry has experienced seismic change. Hyundai Motor Company has grown rapidly to become one of the largest automakers, backed by world class production capability and superior quality. We have now reached a point where we need a qualitative approach to bring bigger ideas and relevant solutions to our customers. This is an opportunity to move forward and we have developed a new brand slogan that encapsulates our willingness to take a big leap. Led by our new slogan and the new thinking underlying it, we will become a company that keeps challenging itself to unlock new possibilities for people and the planet.

+225mm

(Standard roof*)

Tractor : S / H Cargo : S Dump:D/S/L Mixer : S / L

* Day cab for various upper body

* Low roof option for unique upper body (picture)

* Day cab + Low roof not available

Innovative design

Adopting the aerodynamic style that hasn't been implemented in conventional models, the XCIENT is innovatively designed with the inclination of the windshield, expansion of the front volume, and application of dynamic character lines.

Simple and chic in style

XCIENT integrated the color of side-view mirrors, roof visor, side garnish, mud guard, and other components like that of an existing luxury sedan so as to present a sophisticated sense of identity.

- 1. Application of corner vane to reduce side contamination
- 2. Low-drag European mirror
- 3. Corner vane integrated large front grill and wide bumper
- 4. Roof visor and roof spoiler with height adjustment

Outside mirrors

For improved visibility, the presence of blind spot is reduced by enlarging the outside mirror and through the design/utilization of aerodynamic mirror, noise as well as water hold-up phenomenon on the side glass is reduced.

Largest in its class in terms of **storage space**

Stay worry-free as it takes care of your storage needs wherever you go.

- Cup holder
- Cooler and warmer
 (World first refrigerant and electric coil method)
- 3. Overhead console (150 liters)
- 4. Rear overhead console (high roof : 320 liters)

ower crash pad onsole (16 liters)

Lower bed consol (120 liters)

The thoughtful consideration to soothe driver's fatigue after long-hours of driving is reflected in the maximized size of the sheet.

The smart driving space presented only by XCIENT

A total of about 100 functions including a crash pad with optimally arranged hand-reach switches, audio, multi-display, Bluetooth, hands-free system, cruise switch add comfort to your driving.

- . Multi Display (black color)

 Driving information, fault diagnosis, axle weight (air sus.) and etc
- 2. Q800

(Radio + USB + Aux. + CD + i-pod + Bluetooth)

Passenger Seat (Convenience focused seats)

- Belt-in-seat
- Air suspension (option)
- Folding seat (option)

Backward foldin

Forward foldir – Seat cushior

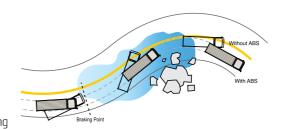

Experience the truck of the future

ABS with ASR (Anti-Slip Regulator)

This ABS (Anti–Locking Brake System) brings the vehicle to a safe, controlled stop and is particularly advantageous whilst driving

under slippery road conditions. The driver can apply maximum pressure on the brake pedal without worrying about wheel lock, skidding and subsequent loss of control. With ABS/ASR, the driver can maintain full directional stability of the vehicle at all times and avoid potentially dangerous situations.

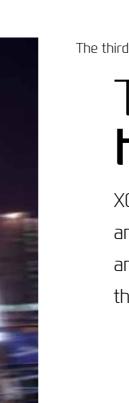

Ergonomic switch operation

The essence of high technology

XCIENT expresses a sense of sophistication both internally and externally as it features metallic pad, new trim colors and pattern, and soft mood light using an LED lamp, an approach that is hardly imagined in other trucks.

Indoor room lamps

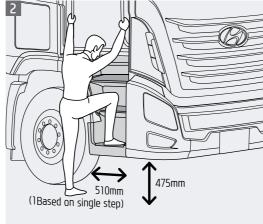

World-class comfort when getting on and off the vehicle

World-class comfort when getting on and off the vehicle is presented through the 105mm lowered stair-type steps, which are the widest in its class.

- . Grip for getting on and off the vehicle
- 2. Inclined steps with the largest cross-sectional area in its class

Comfort by being away even from **fine vibration**

As the first in Korea to use front-wheel air-suspension, XCIENT provides the best riding comfort by lowering the vehicle's vibration frequency from 1.9Hz to 1.1Hz.

Retarder (Option)

This retarder system not only reduces the maintenance cost of a vehicle but also drastically improves driving safety and brake performance by increasing the life of the brake lining by four times.

Automatic (ECAS) 4-bag type air-suspension

Extreme low-temperature testing has been completed

To apply powerful durability as much as possible, Hyundai Xcient has completed extreme low-temperature tests about various driving and durability successfully, and has proved that it is the best truck in the world with strong power and durability as a result.

Improved fuel efficiency Further improvement of profit

With its 7% improved fuel efficiency, XCIENT is guaranteed for maximum practicability and efficiency.
